

The Only Tool You Need to Draft Good Policy – *Now Just \$100*

Creating new policies or completely overhauling your policy manual can be daunting. Take the burden out of this necessary task by ordering the Critical Policy Reference Manual (CPRM). With legal reference pages and sample policies, the CPRM helps you build a successful policy-making foundation.

Here are just a few of the ways the Critical Policy Reference Manual can help your district:

Add New Policies to Your Manual

Each year, new policy is developed on everything from animal dissection to school nutrition. With the CPRM on hand, it's a snap to add new policy language to your manual.

Revise an Existing Manual

If it's been a while since you've reviewed your policy manual, the CPRM provides a standard to evaluate your policies against. The CPRM also references legal cites and monitoring requirements, so you can be sure your current policies are backed by the law.

Write a New Manual from Scratch

The CPRM identifies more than 190 critical policies that every district should have. Along with the CPRM's clear indexing system, these model policies are an excellent starting point for boards who are drafting entirely new manuals.

Order Now and Save—Prices Increase on July 1!

Use the coupon below to order your board's copy of the CPRM—now available in print and on CD-ROM.
