Committee Charge

The Standards and Assessments Committee (S&A) is a standing committee of the Association, consisting of nine to twelve members appointed annually by the president. Membership is based upon an expressed interest and demonstrated expertise in curriculum development and student assessment.

The charge of the Standards and Assessment Committee is to study issues relating to the New Jersey Core Curriculum Content Standards and the state assessment program, report periodically to the Delegate Assembly and shall recommend additions, modifications or deletions to policy as needed. The committee may also recommend positions on standards and assessment issues for consideration by the Board of Directors.

The Standards & Assessments Standing Committee has established the following agenda of projects:

The Standards & Assessment Committee has determined that its overarching obligation is to help the NJSBA membership meet their governance responsibility to provide opportunities for every student to achieve regardless of the zip code of their residence. In order to meet that goal, the S&A Committee will:

- Identify traditional and recent factors (i.e. inherent bias, local land use laws, etc.) that impede student achievement and determine the best means for the S&A Committee to address them.
- Monitor the districts implementation of the recommendations of the NJSBA Student Achievement Task Force Report.
- Monitor the revisions of NJ Teaching and Learning Standards.
- Monitor the impact of the NJ state mandated assessment program.
- Identify and publicize to the NJSBA membership traditional and non-traditional post-secondary programs that provide career training.
- Identify and publicize to boards of education post-secondary educational programs including college, technical, trades, and other post-secondary opportunities.
Standards & Assessment Committee
