NJSBA's Board Member Academy (BMA), created in 1992, provides formal training for the state's local board of education members. Each year, the Academy offers a range of classes and training sessions designed to build your knowledge base and help you become a more successful board member or charter school trustee.

The Board Member Academy includes both individual certification programs and board certification programs. Learn more about the BMA certification program online at www.njsba.org/bma.

NJSBA offers a wide range of programs at statewide and regional training sessions, including the annual Workshop conference, through county school boards association meetings, and online. Whether you are a new board member or a seasoned veteran, NJSBA training will help you grow in your role as a school board member.

Program Registration School board members and school district administrators with an NJSBA account may register themselves online for free programs at www.njsba.org/meetings. Foundations for Success

Foundations for Success equips board members with the skills they need to deal with the issues they face at the board table. The three programs will focus on **School Finance**, **Student Achievement**, and **School Law**, and are offered regionally, hosted through the local county school board associations. These highly interactive and informative programs offer members a way to fill their training requirements of the School District Accountability Act.

Learn more about each of the three programs:

Fundamentals of School Finance With limited resources, it is imperative that school board members have an understanding of school finance – where their revenue comes from, how aid is calculated, the budget process and the impact of bargaining unit contracts on the overall budget. (Completion of this course satisfies the Governance II requirements.)

Board Actions that Impact Student Achievement In recent years New Jersey has revamped state standards and state standardized testing to increase student achievement, but how can local districts use these tools to increase student achievement? Learn about the board's role in student achievement and ways the board and superintendent can work together to keep the district focused on student achievement and preparing students for their future. (Completion of this course satisfies the Governance III requirements.)

Advancements in School Law Whether it is a new legal ruling, a clarification of an existing law, or a new ethics advisory opinion, school board members should be aware of the changes in the law that affect the board of education's operations. In this advanced governance course, board members will receive

comprehensive training in the most recent legal decisions and administrative determinations affecting public education in New Jersey. (Completion of this course satisfies the Governance IV requirements.)

New Jersey School Boards Association County Association Programs

New Jersey's 21 County School Boards Associations offer training, information and forums to explore the issues facing public schools.

County School Boards Associations are an integral part of NJSBA's commitment to provide districts with the tools they need for effective leadership. The county school board association programs are opportunities for board members to receive professional development and up-to-date information on current education initiatives, legislation and regulations affecting public schools.

These interactive forums always include an opportunity for board members from across the county to network with each other, share best practices, and discuss critical issues.

County School Boards Association meetings enable board members to work together locally to advance the achievement of all public school students in New Jersey.

Topics Include:

- Social and Emotional Learning
- Current Issues in School Law
- Regionalization/Consolidation
- School Technology
- Foundations for Success (regional Mandated Training)
